

Pupparazzi Premium Pet Care: Complete Guide & Operations Manual

Welcome to the official operations manual and guide for Pupparazzi Premium Pet Care. This document is designed to give you, your staff, and your clients a crystal-clear understanding of the system's terminology, features, and workflows.

1. Glossary of Terms (90 6,M& > . \$2,)

To ensure everyone is on the same page, here is a detailed explanation of the terminology used throughout the Pupparazzi web application:

Roles & Users (-B.? > 0 */K 0M\$>)

- * Client (M2> / M0>9): The pet owner. They log in to their dashboard to manage their pet's care services (Grooming/Boarding), upload required documents, make payments, and view their history.
- * Staff (0M. >0@): Operative team members. They can access the admin interface to view, manage, and approve bookings, check vaccination status, and assist clients.
- * Admin (!.?(/ 5M/58M%>*): The system owner. Admins have unrestricted access to system settings, financial data, client records, services, coupons, testimonials, and user configurations.

Key Financial Terms (5?\$M\$@/ 6,M&>52@)

- * Revenue (0> 8M5 / A2 .>): The total value of all bookings created by the system, before any discounts or taxes, amount billed to the user.
- * Paid (-A \$>(?/> />): The actual amount the client has already paid via payment gateways (Razorpay, Gokwik, etc.) or cash.
- * Due (, >/> 0>6?): The remaining balance that the client is yet to pay for their services. `Due = Revenue - Paid`.
- * Wallet (5I2G ,H2G 8): A digital purse for each client. Credits or refunds issued by the system can use their wallet balance to pay for future bookings.
- * Outstanding (A2 &G(&>0@): The net amount the client owes to Pupparazzi for upcoming bookings and invoices, accounting for refunds or advance deposits.
- * Invoices ((5I 8 / ,?2): The official itemized receipts generated automatically for each booking. They list the services booked, tax, applied coupons, final amounts, and payment status, complete with the Pupparazzi logo and business address.

Booking Categories (,A ? 6M0G#?/>)

- * **Grooming (M0B.? / *>2\$B *6A @ 8+>)**: Single-session pet spa and sa trimming, nail clipping, massage). These are booked for a specific date and time slot.
 - * **Boarding (,K0M! ? / 9I8M 2)**: Overnight or hourly lodging services for p Boarding charges depend on the hours (slabs) or predefined packages.
 - * **Service Group (8G5> 8.B9)**: A categorization of services (e.g., "Full Gro used to display services neatly in tabs on the website.
-

2. Core Web Application Modules & Features

The application is structured into three main views based on the logged-in user's role:

A. Client Dashboard (M2> *K0M 2)

Clients have a clean, premium, and fully responsive user interface to manage their pet care journey:

1. **Home & Service Booking (/book)**: A highly styled landing screen where services are categorized by tabs (e.g., Grooming, Boarding).
2. **Pet Registry (/dashboard/pets)**: Clients can add new pets, specifying breed, type, weight, dietary needs, allergies, preferences, and uploading medical/vaccination records.
3. **My Bookings (/dashboard/bookings)**: Displays active, completed, and pending bookings.
4. **Booking Details (/dashboard/bookings/[id]/details)**: Shows booking summary, assigned staff, address details, invoices, and a dedicated Document Upload card where they can upload Aadhaar Card, PAN Card, and Vaccine Certificates.
5. **Secure Wallet (/dashboard/wallet)**: View current wallet balances and transaction logs.

B. Admin & Staff Dashboard (!.?(0 8M >+ *K0M 2)

Accessible at `/admin`, this is the command center of the system:

1. **Overview Dashboard**: View today's bookings, revenue metrics, active clients, and quick stats.
2. **Bookings Manager (/admin/bookings)**: Complete list of bookings. Admins can edit, reschedule, mark as completed/cancelled, or view details.
3. **New Booking Console (/admin/bookings/new)**: A unified flow allowing admins to book a service for an *existing* customer or quick-create a *new* customer & pet in one smooth form.
4. **Client Records (/admin/clients)**: A comprehensive directory of all registered clients. Click on any client to view their Client Profile containing detailed booking history, registered pets, full uploaded documents, and matches with legacy imported records.
5. **Vaccination Directory (/admin/vaccination-certificates)**: Centralized dashboard to view and verify all uploaded pet vaccination certificates. Admins can view, download, print, or delete certificates directly.
6. **Services & Coupons (/admin/services` & `/admin/coupons)**: Configure service details, prices, and create discount coupons.

7. Data Import (`/admin/old-data-import`): Process Excel/CSV files containing legacy clients, bookings, and payments, migrating them smoothly into the database.

3. Step-by-Step Booking Workflow (, A ? * M 0 > 0 M / * M 0 # > 2 @)

The booking process is fully aligned and synchronized between the client and administrative flows.

Step 1: Service & Pet Selection

- * Client: Selects which pet needs the service and picks a category (e.g., Grooming/Boarding) from the interactive booking wizard.
- * Admin/Staff: Chooses whether the booking is for an existing client or quick-creates a new user and pet directly on `/admin/bookings/new`.

Step 2: Scheduling & Business Rules

- * Availability Engine: The booking engine queries the database to ensure slot limits are not exceeded for a given day.
- * Sunday Restriction: The system blocks any bookings scheduled on Sundays (both check-in and check-out dates for Boarding and slot dates for Grooming are restricted).
- * Boarding Calculation:
 - * If Boarding is selected, the user inputs check-in and check-out dates and times.
 - * The system calculates the exact hours:
 - * "d 6 Hours: Hourly slab (Rs. 600)
 - * 6 to 12 Hours: Half-day slab (Rs. 900)
 - * > 12 Hours: Daily slab (Rs. 1,200 per day)

Step 3: Checkout & Coupon Discounts

- * Users can input promotional coupon codes (created by admins).
- * The discount is applied in real-time to the final amount.
- * Payments can be made online via integrated options, or marked as Cash-on-Delivery (COD) which requires a small advance payment.

Step 4: Asset Upload & Document CRUD (Aadhaar, PAN, Vaccines)

- * For compliance, clients or admins upload Aadhaar, PAN, and Vaccination certificates.
- * Automatic Compression: Large images or PDFs are automatically routed through our compression utility to save bandwidth and storage.

- * CRUD Deletion Workflow: If an incorrect document is uploaded, it can be deleted:
 - * The client can delete it from their booking details page.
 - * The admin/staff can delete it from the Client Profile Drawer (`/admin/clients`) or the vaccination list (`/admin/vaccination-certificates`).
 - * Deleting a document deletes the reference in the database and cleans up the actual file from Cloudinary storage.

Step 5: Automated Invoice Generation

- * Once booked, the database generates an invoice.
 - * Admins can view and print this premium-designed invoice, which includes:
 - * Official Pupparazzi branding logo.
 - * Service breakdown, GST, discounts, and payment transactions.
 - * Clean layout suitable for desktop display or physical printing.
-

4. Operational Troubleshooting & Quick Actions

1. How to Reset Client Password?

- * Go to `/admin/clients`, find the customer, and expand their row.
- * Type the new password in the "Reset Password" input and click the key icon.

2. How to Verify Vaccinations?

- * Go to `/admin/vaccination-certificates`.
- * Review the pet's name, client name, and certificate preview.
- * Use the search bar to filter by pet name or client details.

3. How to Manage Coupons?

- * Go to `/admin/coupons` and add a new coupon code (e.g., `PUPPY10`), set its discount percentage or flat rate, and hit save.
